

Altech's Glazed-In Panel System

Altech's Glazed-In Panel System is here!

Altech Panel Systems, one of the country's largest manufacturers of premium ACM and MCM Panel Systems is now manufacturing the absolute best, most sophisticated, highest quality metal panels for glazed-in applications available anywhere!

No longer will glass contractors be required to settle for sub-par metal panels for their glazed-in panel applications!

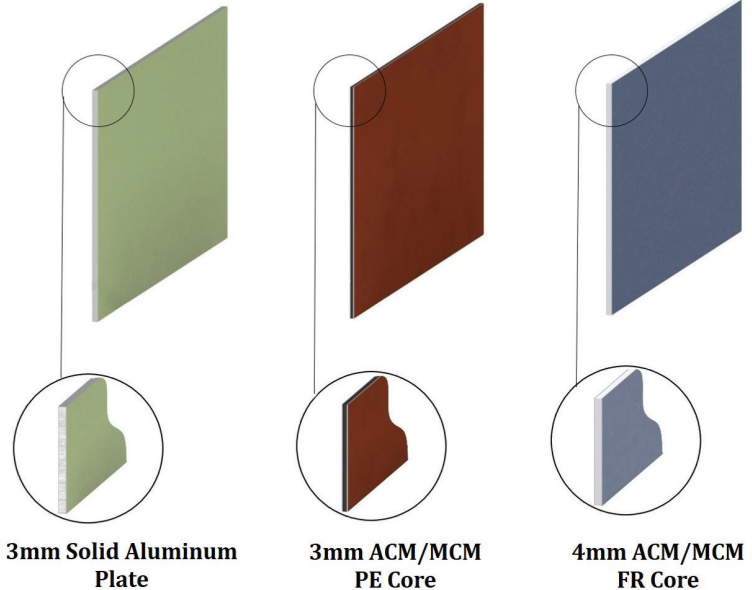

These are just a few examples of glazed-in panels Altech has produced for glazing contractors just like yours! Altech can engineer and manufacture affordable standard panels to fit within any glass system.

We will also produce custom glazed-in panels that will meet your project-specific needs. We make panels for 4-sided capture, 2-sided capture, butt-glazed or even variable plane applications. Custom shapes, reveals, colors and textures are all affordable and readily available!

Choose from three types of metal panel for your project:

- 3 mm Solid Aluminum **alfrex** Plate
- 3 mm ACM/MCM
*Non-Fire Resistant Core
- 4 mm ACM/MCM
**Fire Resistant Core

Altech glazed-in panels are all factory-sealed and watertight! They come to your job just like glass, install just like glass and sit in the glass pocket just like glass!

No special tools, no special equipment! Simply glaze them into any glass system!

Our panels are made with extreme precision. They will fit perfectly, guaranteed!
